BlazeVideo DVD Ripper [Win/Mac]

BlazeVideo DVD Ripper is a DVD ripper designed specifically for helping you convert DVD content to video formats which are compatible with BlackBerry, iPhone, iPod, Sony PSP, and other devices. Straightforward looks The GUI looks clean and simple. There's support for an online help manual in case you want to find out more about the program's ripping capabilities. You can take advantage of the built-in video player for previewing the clips stored on the DVD. You are allowed to play or stop the current video selection, and adjust the volume. Automatic DVD detection and ripping options As soon as you insert the DVD into the CD-ROM, the program is able to automatically read and display its content in the main window. It also shows information about the DVD video size and quality with the aid of two colorful progress bars. The ripping process is reduced to only three steps: you need to select the target DVD, pick the saving directory, and choose the output format, namely MP4 or 3GP. Advanced parameters give you the possibility to configure the video profile in terms of resolution, bitrate and frame rate, while the audio one can be tweaked by modifying the format, bitrate, sample rate and channels. You can opt for copying the entire DVD content or main movie. Plus, you get to manually select the items that you want to save on the disk, namely segments of the movie, audio items and subtitles. A few configuration settings enable you to select the work space folder where temporary files are stored, automatically delete temporary items at the end of the process, and turn off the computer when the ripping task is completed. Final remarks All in all, BlazeVideo DVD Ripper makes it possible to rip and back up DVD movies in order to be able to watch them on mobile devices. The intuitive feature pack makes it suitable for rookies and professionals alike.
