I rest my case, the more you learn about Photoshop the more you realize its usefulness and versatility. Which is the best could be entirely depended on what you will be using the program for. How much will you be using it for and what sorts of tasks will you be using it for. There is no version of Photoshop that is best for beginners because the programs could differ greatly. The Photo plan would be the best option for someone that is just beginning to learn how to use Photoshop. *If this is the case, then you will want to choose the "Photography" plan, which has the best value for Photoshop.* Adobe Photoshop software is used for creating and editing images on the computer. You can import images from removable media or through a connected camera. You create print documents that you can view or edit at your convenience. You can specify a specific coordinate system, locale, and number of image colors or levels. When you print to a printer or view a print preview, the icon can be changed to help you view the image in more detail. You can work with layers and apply effects and filters, correct lighting, and rotate, move, scale, or crop the image. You can use Adobe Photoshop Elements to create, edit, and save videos and images. Enhance and convert images. Adobe Photoshop Elements also enables easier editing of multiple images in a batch. You can sharpen, lighten, or darken a photo to bring out details you want to emphasize in the image. When you create an image in Adobe Photoshop Elements and export it as a separate layer, you can create a book using the Pages feature. You can also create PDFs or TIFF files and exit the application to edit images on other programs such as Photo Shop, Illustrator, or Photoshop. You can explore filters and apply them to images to enhance them. You can quickly and easily adjust the image with the crop tool, scroll the image to place it where you want it in the final document, or distress the image using a tool called 'levels'. When you add text to an image, you can freely select a typeface, size, and color, and control where you want the text placed. e3d0a04c9c
